

Data science lab: Process and methods Politecnico di Torino

Exam rules July and September Sessions A.Y. 2019/2020 (COVID-19 emergency)

The rules regarding the individual project do not change with respect to the original rules of the course. Please see the original course rules for information.

Written part. The written part covers the theoretical topics of the course. It includes multiple-choice and box-to-fill questions, based on solving exercises related to theoretical aspects.

The written exam takes place with a PC using the *Exam* university framework integrated with the *Respondus* proctoring tool.

- The correct execution of the exam on the Respondus tool will be verified and irregular behaviors will be prosecuted following the university rules.

Rules for the written part

- Only students regularly booked through the "Portale della Didattica" are admitted for the written part.
- Students must show their own identity document with photo.
- The written part **lasts 50 minutes**.
- Books, notes, electronic devices of any kind (cellphone, other PC/laptop/tablet) apart from the one used for the exam **are not allowed**.
- In case of connectivity problems (or other technical problems) the university rules in the "Guidelines for online exams" will be followed.

Structure of the written part

The structure of the written part is unchanged. We recap here the main points. Please see the original course rules for more information.

- The written part includes up to 12 questions, the maximum total score is 12/30.

- For each question, there is a single correct answer. Only for multiple-choice questions, wrong answers are penalized. Points of each question will be specified in the exam text.

Final grade. The rules to form the final grade are unchanged. Please see the original course rules for more information.
